505-5101. The direct replacement Multi-Purpose Sensor is ideal for measuring coolant and auto transmission temperature. Each replacement restores proper vehicle operation and provides a longer service life.

505-5101, Engine Coolant Temperature Sensor (International)
International Truck and Engine Corp offers information for truck and bus owners on benefits of extended-life coolant. Extended-life coolants use advanced organic acid technology - which depletes much more slowly than traditional coolant additives - to protect the engine.

International Truck Outlines Benefits of Extended-Life Coolant
I have a dt466 that had both problems at different times. The oil in water ended up being the oil cooler. I also had mine tested, but it didn't show as leaking unless it was at operating temperature. The rad shop i had test it couldn't heat it to 190 degrees and pressurize it at the same time. I replaced it with a reman one and all was well.
